

## Mini-Project: Elevate Your Prompts Game!

Mastering the art of effective prompts requires nothing but practice. In the spirit of that, here are a few more practice exercises for you!

### Exercise 1: Prompt Analysis

**Prompt:** "Tell me about the universe."

**Prompt:** "Describe a memorable vacation."

**Prompt:** "Write lyrics to a country song."

Take these prompts and analyze their effectiveness based on the best practices discussed in the unit. Consider the clarity, specificity, inclusion of contextual information, and adherence to the target audience.

### Exercise 2: Prompt Revision

**Prompt:** "Tell me about food."

**Prompt:** "What is your favorite hobby?"

**Prompt:** "Write a poem about love."

Choose these vague or poorly structured prompts and revise them using the best practices outlined in the article. Focus on enhancing clarity, specificity, and including relevant contextual information.

### Exercise 3: Response Comparison

**Prompt:** "What are some summer activities?"

**Prompt:** "What are some activities I can partake in on the beach during summer?"

**Prompt:** "What are some beach activities during sunny days in California?"

Generate responses from Chat-GPT on the above. The prompts slightly vary in wording, context, or specificity, but the underlying intent is similar. Compare the responses and observe how these subtle changes affect the generated output. Reflect on the impact of priming and conditioning in this exercise.
